

Oroville Union High School District

School Wellness Policy

On Physical Activity and Nutrition

June 2006

(Revised 2014)

TITLE: Wellness Policies on Physical Activity and Nutrition

In the Child Nutrition and WIC Reauthorization Act of 2004, the U.S. Congress established a new requirement that all school districts with a federally-funded school meals program develop and implement wellness policies that address nutrition and physical activity by the start of the 2006-2007 school year [provide link to Section 204].

Preamble

Whereas, children need access to healthful foods and opportunities to be physically active in order to grow, learn, and thrive;

Whereas, good health fosters student attendance and education;

Whereas, obesity rates have doubled in children and tripled in adolescents over the last two decades, and physical inactivity and excessive calorie intake are the predominant causes of obesity;

Whereas, heart disease, cancer, stroke, and diabetes are responsible for two-thirds of deaths in the United States, and major risk factors for those diseases, including unhealthy eating habits, physical inactivity, and obesity, often are established in childhood;

Whereas, 33% of high school students do not participate in sufficient vigorous physical activity and 72% of high school students do not attend daily physical education classes;

Whereas, only 2% of children (2 to 19 years) eat a healthy diet consistent with the five main recommendations from the Food Guide Pyramid;

Whereas, nationally, the items most commonly sold from school vending machines, school stores, and snack bars include low-nutrition foods and beverages, such as soda, sports drinks, imitation fruit juices, chips, candy, cookies, and snack cakes;

Whereas, school districts around the country are facing significant fiscal and scheduling constraints; and

Whereas, community participation is essential to the development and implementation of successful school wellness policies;

Thus, the Oroville Union High School District is committed to providing school environments that promote and protect children’s health, well-being, and ability to learn by supporting healthy eating and physical activity. Therefore, it is the policy of the Oroville Union High School District that:

- The school district will engage students, parents, teachers, food service professionals, health professionals, and other interested community members in developing, implementing, monitoring, and reviewing district-wide nutrition and physical activity policies.

- All students in grades 9-12 will have opportunities, support, and encouragement to be physically active on a regular basis.
- Foods and beverages sold or served at school will meet the nutrition recommendations of the *U.S. Dietary Guidelines for Americans*.
- Qualified child nutrition professionals will provide students with access to a variety of affordable, nutritious, and appealing foods that meet the health and nutrition needs of students; will accommodate the religious, ethnic, and cultural diversity of the student body in meal planning; and will provide clean, safe, and pleasant settings and adequate time for students to eat.
- All schools in our district will participate in the available federal school meal program.
- The school district will provide nutrition education and physical education to foster lifelong habits of healthy eating and physical activity, and will establish linkages between health education and school meal programs, and with related community services.

TO ACHIEVE THESE POLICY GOALS:

I. School Site Council

The school district and/or individual schools within the district will create, strengthen, or work within the existing school site council to develop, implement, monitor, review, and, as necessary, revise school nutrition and physical activity policies. The council also will serve as a resource to school sites for implementing those policies. (The school site council consists of a group of individuals representing the school and community. It includes parents, student, and representatives of the school food authority, school administrators, teachers, health professionals, and members of the public.) The school Site Council will submit to the School Board the school nutrition and physical activity policy for approval.

II. Nutritional Quality of Foods and Beverages Sold and Served on Campus

School Meals

Meals served through the National School Lunch and Breakfast Programs will:

- Be appealing and attractive to children;
- Be served in clean and pleasant settings;

- Meet, at a minimum, nutrition requirements established by local, state, and federal statutes and regulations;
- Offer a variety of fruits and vegetables;¹
- Serve only low-fat (1%) milk and nonfat chocolate milk² and nutritionally-equivalent non-dairy alternatives (to be defined by USDA); and
- Ensure that half of the served grains are whole grain.^{3,3}

The school district will engage students and parents, through the Sierra Cascade Nutrition & Activity Consortium (SCNAC) with the taste-tests of new entrees and surveys, in selecting foods sold through the school meal programs in order to identify new, healthful, and appealing food choices. In addition, the school district will share information about the nutritional content of meals with parents and students. Such information will be made available through the SCNAC program, on the school menus, website, cafeteria menu boards, and other point-of-purchase materials.

Breakfast. To ensure that all children have breakfast, either at home or at school, in order to meet their nutritional needs and enhance their ability to learn:

- The school district will, to the extent possible, operate the School Breakfast Program.
- The school district will, to the extent possible, arrange bus schedules and utilize methods to serve school breakfasts that encourage participation by offering a “grab-and-go” breakfast .
- The school district will notify parents and students of the availability of the School Breakfast Program.
- The school district will encourage parents to provide a healthy breakfast for their children through newsletter articles, take-home materials, or other means through the SCNAC program.

Free and Reduced-priced Meals. The school district will make every effort to eliminate any social stigma attached to, and prevent the overt identification of, students who are

¹ To the extent possible, the school district will offer at least two non-fried vegetable and two fruit options each day and will offer five different fruits and five different vegetables over the course of a week. The school district will encourage to source fresh fruits and vegetables from local farmers when practicable.

² As recommended by the *Dietary Guidelines for Americans 2005*.

³ A whole grain is one labeled as a “whole” grain product or with a whole grain listed as the primary grain ingredient in the ingredient statement. Examples include “whole” wheat flour, cracked wheat, brown rice, and oatmeal.

eligible for free and reduced-price school meals⁴. Toward this end, the school district will utilize Nutrikids Point of Sale (POS) which is an electronic identification and payment system; provide nutritionally adequate free and reduced price meals for students who meet federal eligibility criteria; promote the availability of school meals to all students; and/or use nontraditional methods for serving school meals, such as “grab-and-go” breakfast.

Summer Food Service Program. The school district, which has more than 50% of students eligible for free or reduced-price school meals, will make available for the students a Summer Food Service Program on campus through the Migrant Ed program.

Meal Times and Scheduling. The school district:

- Will provide students with at least 10 minutes to eat after sitting down for breakfast and 20 minutes after sitting down for lunch;
- Will schedule meal periods at appropriate times, *e.g.*, lunch should be scheduled between 11 a.m. and 1 p.m.;
- Will not schedule tutoring, club, or organizational meetings or activities during mealtimes, unless students eat during such activities;
- Will provide students access to hand washing or hand sanitizing before they eat meals or snacks; and
- Will take reasonable steps to accommodate the tooth-brushing regimens of students with special oral health needs (*e.g.*, orthodontia or high tooth decay risk).

Qualifications of School Food Service Staff. Qualified nutrition professionals will administer the school meal programs. As part of the school district’s responsibility to operate a food service program, the school district will provide continuing professional development for all nutrition professionals in the school district. Staff development programs will include appropriate certification and/or training programs for child nutrition directors, school nutrition managers, and cafeteria workers, according to their levels of responsibility.⁵

Sharing of Foods and Beverages. The school district will discourage students from sharing their foods or beverages with one another during meal or snack times, given concerns about allergies and other restrictions on some children’s diets.

⁴ It is against the law to make others in the cafeteria aware of the eligibility status of children for free, reduced-price, or “paid” meals.

⁵ School nutrition staff development programs are available through the USDA, School Nutrition Association, and National Food Service Management Institute.

Foods and Beverages Sold Individually (*i.e.*, foods sold outside of reimbursable school meals, such as through vending machines, cafeteria a la carte [snack] lines, fundraisers, school stores, etc.)

High Schools. In high schools, all foods and beverages sold individually outside the reimbursable school meal programs (including those sold through a la carte [snack] lines, vending machines, student stores, or fundraising activities) during the school day, or through programs for students after the school day, will meet the following nutrition and portion size standards required.

Beverages (Standards for beverages sold in the high schools will meet the following requirements for no less than 50% of all beverages effective July 1, 2007, Ed. Code 49431.5), and 100% effective July 1, 2009, are:

- **Allowed:** water or seltzer water⁶ without added caloric sweeteners; fruit and vegetable juices and fruit-based drinks that contain at least 50% fruit juice and that do not contain additional caloric sweeteners; unflavored or flavored low-fat or fat-free fluid milk and nutritionally-equivalent nondairy beverages (to be defined by USDA);
- **Not allowed:** soft drinks containing caloric sweeteners; sports drinks; iced teas; fruit-based drinks that contain less than 50% real fruit juice or that contain additional caloric sweeteners; beverages containing caffeine, excluding low fat or fat-free chocolate milk (which contain trivial amounts of caffeine).

Drinking Water Quality and Access (...a school district shall provide access to free, fresh drinking water during meal times in the food service areas of the schools..., including, but not necessarily limited to, areas where reimbursable meals under the National School Lunch Program or Federal School Breakfast Program are served or consumed effective July 1, 2011, SB 1413, EC Section 38086.)

- Provide water dispensers in the Cafeteria/Food Service area by placing large containers of chilled tap water in the cafeteria during meal times to encourage increased water consumption by all students, not just those who participate in the meal program.
- Provide all students and employees with access to clean, safe, palatable drinking water free of charge at every School Site.

Foods (Standards for foods, in addition to the USDA reimbursable meals, that may be sold during the school day in high schools, effective July 1,

⁶ Surprisingly, seltzer water may not be sold during meal times in areas of the school where food is sold or eaten because it is considered a "Food of Minimal Nutritional Value" (Appendix B of 7 CFR Part 210).

2007 (Ed. Code 49431.2) are:

- A food item sold individually:
 - Will have no more than 35% of its calories from fat (excluding nuts, seeds, peanut butter, and other nut butters) and 10% of its calories from saturated and trans fat combined;
 - Will have no more than 35% of its *weight* from added sugars;⁷
 - Will contain no more than 230 mg of sodium per serving for chips, cereals, crackers, French fries, baked goods, and other snack items; will contain no more than 480 mg of sodium per serving for pastas, meats, and soups; and will contain no more than 600 mg of sodium for pizza, sandwiches, and main dishes.

- A choice of at least two fruits and/or non-fried vegetables will be offered for sale at any location on the school site where foods are sold. Such items could include, but are not limited to, fresh fruits and vegetables; 100% fruit or vegetable juice; fruit-based drinks that are at least 50% fruit juice and that do not contain additional caloric sweeteners; cooked, dried, or canned fruits (canned in fruit juice or light syrup); and cooked, dried, or canned vegetables (that meet the above fat and sodium guidelines).⁸

Portion Sizes:

- Limit portion sizes of foods and beverages sold individually to those listed below:
 - One and one-quarter ounces for chips, crackers, popcorn, cereal, trail mix, nuts, seeds, dried fruit, or jerky;
 - One ounce for cookies;
 - Two ounces for cereal bars, granola bars, pastries, muffins, doughnuts, bagels, and other bakery items;
 - Four fluid ounces for frozen desserts, including, but not limited to, low-fat or fat-free ice cream;
 - Eight ounces for non-frozen yogurt;
 - Twelve fluid ounces for beverages, excluding water; and

⁷ If a food manufacturer fails to provide the *added* sugars content of a food item, use the percentage of weight from *total* sugars (in place of the percentage of weight from *added* sugars), and exempt fruits, vegetables, and dairy foods from this total sugars limit.

⁸ Schools that have vending machines are encouraged to include refrigerated snack vending machines, which can accommodate fruits, vegetables, yogurts, and other perishable items.

- The portion size of a la carte entrees and side dishes, including potatoes, will not be greater than the size of comparable portions offered as part of school meals. Fruits and non-fried vegetables are exempt from portion-size limits.

Fundraising Activities. To support children's health and school nutrition-education efforts, school fundraising activities will not involve food or will use only foods that meet the above nutrition and portion size standards for foods and beverages sold individually, and shall not impair student participation in the district's food service program. The school district will encourage fundraising activities that promote physical activity. The school district will make available a list of ideas for acceptable fundraising activities.

The sale of foods during meal periods in food service areas shall be allowed only if all income from the sale, including the sale of approved foods or drinks from vending machines, accrues to the benefit of the school, the school food service program, or the student organization(s) sponsoring the sale. The Superintendent or designee will approve the sale of all food items and beverages outside the district's food services program, including sales by student or adult organizations, sales through vending machines and/or sales at secondary school student stores for fundraising purposes, Food sales are prohibited during school hours, and within **one half hour** before or after school hours, with the exception of approved student organizational sales. A student organization may be approved to sell food items during or after the school day if all of the following conditions are met: (5 CCR 15501)

1. Only one student organization conducts food sales on a given school day and the organization sells no more than three types of food or beverage items, except that up to **four** days during the school year may be designated on which any number of organizations may conduct the sale of any food items.
2. The Superintendent or designee approves the specific nutritious food items.
3. The sales during the regular school day are not of food items prepared on the premises.
4. The food items sold are not those sold in the district's food service program at that school during that school day.

When the district, a student or adult organization sponsors vending machines, the Superintendent or designee shall determine how and where vending machines may be placed at school sites, district offices or other school facilities.

Snacks. Snacks served during the school day or in after-school care or enrichment programs will make a positive contribution to children's diets and health, with an emphasis on serving fruits and vegetables as the primary snacks and water as the primary beverage. The school district will assess if and when to offer snacks based on timing of school meals, children's nutritional needs, children's ages, and other considerations. The district will disseminate a list of healthful snack items to teachers, after-school program personnel, and parents.

Rewards. The school district will use foods or beverages that meet the nutrition standards outlined above as rewards for academic performance or good behavior,⁹ and will not withhold food or beverages (including food served through school meals) as a punishment.

School-sponsored Events: (such as, but not limited to, athletic events, dances, or performances). Foods and beverages offered or sold at school-sponsored events outside the school day will be encouraged to meet the nutrition standards for meals or for foods and beverages sold individually (above).

Food Service/Facilities. The school meal program shall be an integral part of our total educational program. An attractive, wholesome, well-balance meal is essential to promote the best work from the students.

To accomplish this objective with appropriate economy, all administration of the food services program will be coordinated in the office of the Business Manager. Business functions to be centralized will include central purchasing of food and supplies, a district-wide salary schedule for all food service employees, centrally planned menus, and regular audit of all accounts.

Use of Food Service Facilities. Pursuant to the provisions of Section 39872 of the Ed. Code, the following persons and groups are exempted from the operation of Section 39872 and are permitted to use the food service facilities:

1. Members of the staff of the State Department of Education and the Office of the County Superintendent of Schools
2. Member of parent-teacher organizations
3. Guests of district employees

III. Nutrition and Physical Activity Promotion and Food Marketing

Nutrition Education and Promotion. The Oroville Union High School District aims to teach, encourage, and support healthy eating by students. The school district will provide nutrition education and engage in nutrition promotion that:

- Is offered at each grade level as part of a sequential, comprehensive, standards-based program designed to provide students with the knowledge and skills necessary to promote and protect their health;
- Is part of not only health education classes, but also classroom instruction in subjects such as math, science, language arts, social sciences, and elective subjects;
- Includes enjoyable, developmentally-appropriate, culturally-relevant, participatory activities, such as contests, promotions,

⁹ Unless this practice is allowed by a student's individual education plan (IEP).

taste testing, farm visits, and school gardens;

- Promotes fruits, vegetables, whole grain products, low-fat and fat-free dairy products, healthy food preparation methods, and health-enhancing nutrition practices;
- Emphasizes caloric balance between food intake and energy expenditure (physical activity/exercise);
- Links with school meal programs, other school foods, and nutrition-related community services;
- Teaches media literacy with an emphasis on food marketing; and
- Includes training for teachers and other staff.

Integrating Physical Activity into the Classroom Setting. For students to receive the nationally recommended amount of daily physical activity (*i.e.*, at least 60 minutes per day) and for students to fully embrace regular physical activity as a personal behavior, students need opportunities for physical activity beyond physical education class. Toward that end:

- Classroom health education will complement physical education by reinforcing the knowledge and self-management skills needed to maintain a physically-active lifestyle and to reduce time spent on sedentary activities, such as watching television;
- Opportunities for physical activity will be incorporated into other subject lessons; and
- Classroom teachers will provide short physical activity breaks between lessons or classes, as appropriate.

Communications with Parents. The district/school will support parents' efforts to provide a healthy diet and daily physical activity for their children. The district/school will offer healthy eating seminars for parents, send home nutrition information, post nutrition tips on school websites, and provide nutrient analyses of school menus. The school district will encourage parents to pack healthy lunches and snacks and to refrain from including beverages and foods that do not meet the above nutrition standards for individual foods and beverages. The district/school will provide parents a list of foods that meet the district's snack standards and ideas for healthy celebrations/parties, rewards, and fundraising activities. In addition, the district/school will provide opportunities for parents to share their healthy food practices with others in the school community.

The district/school will provide information about physical education and other school-based physical activity opportunities before, during, and after the school day; and support parents' efforts to provide their children with opportunities to be physically active

outside of school. Such supports will include sharing information about physical activity and physical education through a website, newsletter, or other take-home materials, special events, or physical education homework.

Food Marketing in Schools. School-based marketing will be consistent with nutrition education and health promotion. As such, schools will limit food and beverage marketing to the promotion of foods and beverages that meet the nutrition standards for meals or for foods and beverages sold individually (above).¹⁰ School-based marketing of brands promoting predominantly low-nutrition foods and beverages¹¹ is prohibited. The promotion of healthy foods, including fruits, vegetables, whole grains, and low-fat dairy products is encouraged. Any marketing promoting low nutritional products will be eliminated as any existing equipment is replaced.

Examples of marketing techniques include the following: logos and brand names on/in vending machines, books or curricula, textbook covers, school supplies, scoreboards, school structures, and sports equipment; educational incentive programs that provide food as a reward; programs that provide schools with supplies when families buy low-nutrition food products; in-school television, such as Channel One; free samples or coupons; and food sales through fundraising activities. Marketing activities that promote healthful behaviors (and are therefore allowable) include: vending machine covers promoting water; pricing structures that promote healthy options in a la carte lines or vending machines; sales of fruit for fundraisers; and coupons for discount gym memberships.

Staff Wellness. The Oroville Union High School District highly values the health and well being of every staff member. The district is participating in the JPA program (Joint Powers Authority) that allows public entities to join together to “pool” resources, in this case health benefits by providing well-managed, cost-contained program that promote health and safety and are actuarially sound and comprehensive made available to every staff member. Butte Schools Self-Funded Program website is <http://www.bcoe.org/bssp/>

IV. Physical Activity Opportunities and Physical Education

Daily Physical Education (P.E.) K-12. All students in grades 9-12, including students with disabilities, special health-care needs, and in alternative educational settings, will receive daily physical education (or its equivalent of 150 minutes/week for elementary school students and 225 minutes/week for middle and high school students) for the entire school year. A certified physical education teacher will teach all physical education. Student involvement in other activities involving physical activity (e.g., interscholastic or intramural sports) will not be substituted for meeting the physical education requirement. Students will spend at least 50 percent of physical education class time participating in moderate to vigorous physical activity.

¹⁰ Advertising of low-nutrition foods and beverages is permitted in supplementary classroom and library materials, such as newspapers, magazines, the Internet, and similar media, when such materials are used in a class lesson or activity, or as a research tool.

¹¹ Schools should not permit general brand marketing for food brands under which more than half of the foods or beverages do not meet the nutrition standards for foods sold individually or the meals are not consistent with school meal nutrition standards.

The school district will discourage extended periods (*i.e.*, periods of two or more hours) of inactivity. When activities, such as mandatory school-wide testing, make it necessary for students to remain indoors for long periods of time, schools should give students periodic breaks during which they are encouraged to stand and be moderately active.

Physical Activity Opportunities Before and After School. All high schools will offer extracurricular physical activity programs, such as physical activity clubs or intramural programs. All comprehensive high schools will offer interscholastic sports programs. The school district will offer a range of activities that meet the needs, interests, and abilities of all students, including boys, girls, students with disabilities, and students with special health-care needs.

After-school childcare and enrichment programs will provide and encourage – verbally and through the provision of space, equipment, and activities – daily periods of moderate to vigorous physical activity for all participants.

Physical Activity and Punishment. Teachers and other school and community personnel will not use physical activity (*e.g.*, running laps, pushups) or withhold opportunities for physical activity (*e.g.*, recess, physical education) as punishment.

Safe Routes to School. The school district will assess and, if necessary and to the extent possible, make needed improvements to make it safer and easier for students to walk and bike to school. When appropriate, the district will work together with local public works, public safety, and/or police departments in those efforts. The school district will explore the availability of federal “safe routes to school” funds, administered by the state department of transportation, to finance such improvements. The school district will encourage students to use district-provided transportation where available.

Use of School Facilities Outside of School Hours. School spaces and facilities will be available to students, staff, and community members before, during, and after the school day, on weekends, and during school vacations. These spaces and facilities also should be available to community agencies and organizations offering physical activity and nutrition programs. The school district policy concerning safety will apply at all times.

V. Monitoring and Policy Review

Monitoring. The superintendent or designee will ensure compliance with established district-wide nutrition and physical activity wellness policies. In each school, the principal will ensure compliance with those policies in his/her school and will report on the school’s compliance to the school Business Manager, and the district superintendent of schools, who is ultimately responsible for executing this policy.

School food service staff, at the school or district level, will ensure compliance with nutrition policies within school food service areas and will report on this matter to the superintendent (or if done at the school level, to the school principal).

The Food Service Director will develop a summary report every two years on district-wide compliance with the district's established nutrition and physical activity wellness policies, based on input from schools within the district. That report will be provided to the school board and also distributed to all school site council, parent/teacher organizations, school principals, and school health services personnel in the district.

Policy Review. To help with the initial development of the district's wellness policies on physical activity and nutrition, each school in the district will conduct a baseline assessment of the school's existing nutrition and physical activity environments and policies.¹² The results of those school-by-school assessments will be compiled by the Food Service Director to identify and prioritize needs.

Assessments will be repeated every three years to help review policy compliance, assess progress, and determine areas in need of improvement. As part of that review, the school district will review our nutrition and physical activity policies; provision of an environment that supports healthy eating and physical activity; and nutrition and physical education policies and program elements. The district, and individual schools within the district, will, as necessary, revise the wellness policies and develop work plans to facilitate their implementation.

¹² Useful self-assessment and planning tools include the *School Health Index* from the Centers for Disease Control and Prevention (CDC), *Changing the Scene* from the Team Nutrition Program of the U.S. Department of Agriculture (USDA), and *Opportunity to Learn Standards for Elementary, Middle, and High School Physical Education* from the National Association for Sport and Physical Education.
